

TEMPLATES ISSUE 6

CUTE COIN PURSE

Charlie Moorby

Purse body
Cut 2

HOW TO MAKE:

01 Cut out a front and back from the two pieces of fabric using the template opposite. (If you have some iron-on interfacing handy you can back both pieces to strengthen the fabric slightly.)

02 Using the pre-cut notches on your template piece, fold over and glue them down as shown below. This is to strengthen the tops of your pieces.

03 Cut out any extra detail you'd like to add to your purse. Add to the main pieces with fabric glue or tiny stitches. Make sure you do this now before you start stitching the sides together!

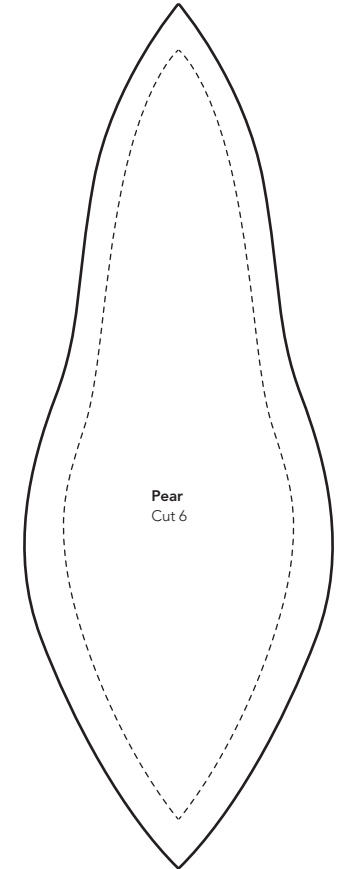

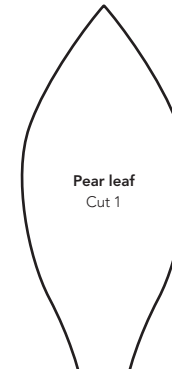

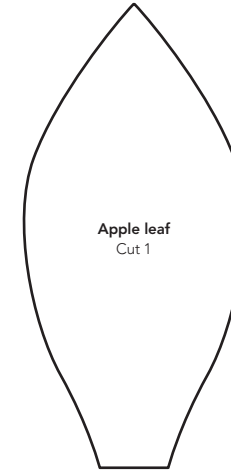

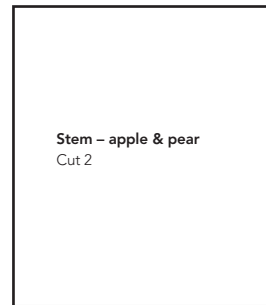

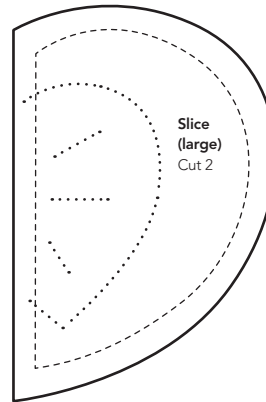

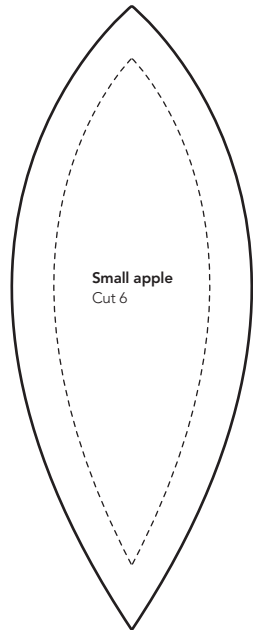

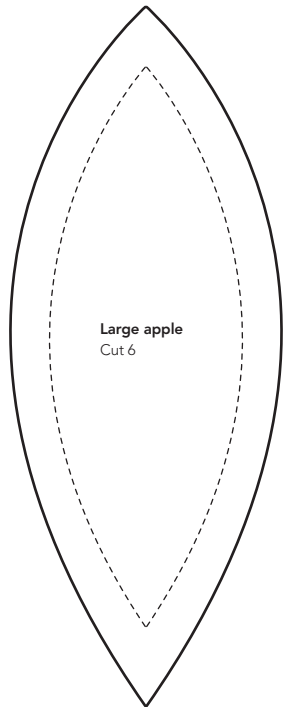

04 Place right sides together and backstitch around the bottom curve, 5mm from the edge. Turn right side out.

05 Now here's the fiddly bit. Take some strong adhesive and carefully tuck and glue the tops of the purse (the strengthened edges you folded over) into the channels in the clasp. Take the paper cord that comes with the metal frame, and cut it in half. Push it into the channels as well, to keep the fabric in place.

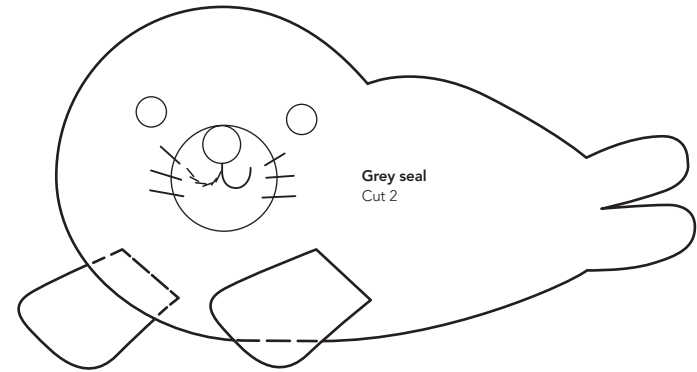

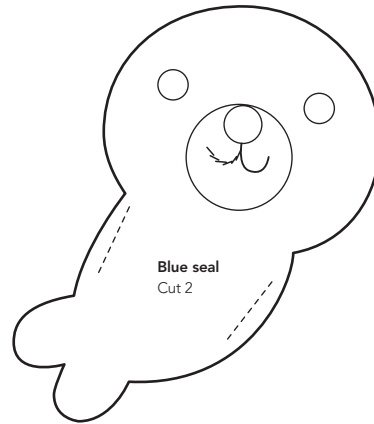

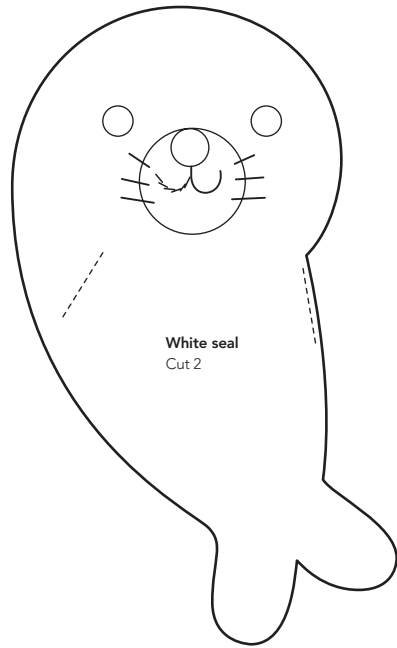

06 Wait for the glue to dry. Then use a damp cloth (or cotton bud) to remove any excess from the metal frame so it's nice and shiny. It's now time to fill your new purse with pennies and hit the shops!
